## Embroidery Styles

**Logo Colors:** When you select logo colors for your garment, we make every effort to match our thread colors as closely as possible to your logo colors in order to maintain the integrity of your company's logo.

**Match Trim Color:** Specifically designed for apparel fashioned with two or more colors. The contrast color is usually chosen from the trim on the collar and cuffs, or a pre-embroidered logo (PING, Adidas, etc). This is a 1 color option coordinated for a classically finished look.

**Tone on Tone:** Thread color will be either slightly lighter or slightly darker than the main fabric of the garment. The result is a visible but subtle logo on your apparel. This is an excellent choice for dressier clothing or for apparel colors that conflict with logo colors.
